

PHOENIX Beattie

Hose Management

Fluid Technology

Continental 
CONTITECH

ContiTech Beattie Limited is recognised as a world leader in the design, manufacture and supply of flexible hoses, couplings and fluid transfer systems to the Oil and Gas Industry. The company, which is now a wholly owned subsidiary of Continental AG, began trading over 45 years ago and has modern manufacturing facilities at its Ashington headquarters and also in Aberdeen.

ContiTech Beattie is capable of offering a comprehensive range of products and services, from flexible hose assemblies to complete fluid transfer systems. The products and services offered by the Company are split into four main business areas "Hose and Couplings", "High Pressure Drilling and Production Hoses", "Fluid Handling Systems" and "Hose Management".

Experienced engineering and project management teams meet customer requirements from conceptual stage to the delivery of fully integrated hose systems. The company can also provide installation and commissioning services, and provide training of client's personnel for both onshore and offshore projects. All products supplied are backed by extensive research and development.

The company is structured to provide a worldwide service that enhances our reputation of consistently providing innovative solutions through practical design.

Quality, Safety and Environmental issues are of prime importance to ContiTech Beattie Limited and the company holds the following approvals; LRQA Quality Management System approval to ISO 9001:2000, Environmental Management System Standard ISO 14001:2004, Health & Safety Standard OHSAS 18001:2007 and Lloyds Register Verification to Pressure Equipment Directive 97/23/EC.

ContiTech Beattie Limited has extensive experience and expertise in the manufacture of low pressure and high pressure hoses for the Oil and Gas Industry and is recognized by many of the well known international oil and gas producers and operators for offering early identification of potential failures, planning hose replacement at the convenience of operations and timely sourcing of special hoses.

Services offered range from conceptual studies to detailed engineering, procurement, project management, specifications, cost analysis, certification, installation, commissioning and maintenance.

ContiTech Beattie Limited provides Hose Management services to customers world-wide

Specialist teams of Hose Management Technicians are based at the head office in Ashington, Northumberland and at the company's Aberdeen Operations. These teams provide hose management services for both onshore and offshore installations including training of the operator's personnel in the maintenance and care of hoses to maximize the life of hose assemblies. All our inspectors are experienced hose fitters who have gone through extensive training and have a vast knowledge of the wide range of hose

assemblies that are in use within the oil and gas industry.

The ContiTech Beattie Limited Plant, located at Ashington, Northumberland employs the latest technology to manufacture hose couplings and fittings, coupled with extensive hose storage facilities at Ashington and Aberdeen, we offer reliable and quality products to the demanding Oil and Gas Industry.

Inspection and Testing:

A complete range of technical analysis, inspection and testing services, covering high pressure testing, recertification, boroscope internal inspection, static and dynamic analysis.

Repairs:

Repair of flexible hoses and couplings, where appropriate.

Training:

The training programme is based on over 45 years experience in the flexible hose business. All training conforms to Personnel Competency requirements of the UKOOA Guidelines (ContiTech Beattie Limited played a major role in writing these guidelines). The programme covers both theory and practical elements and on completion, client's engineers will be competent to carry out 3-monthly or first line inspection, will have knowledge regarding the effects of losing integrity of the liner or outer cover, correct installation, recognizing aspects such as over bending, non-flexible length criteria, etc.

Inventory Management:

A comprehensive inventory management service for flexible hoses, which gives clients an accurate and reliable system of recording all flexible hoses to ensure correct specification, installation, maintenance and procurement. Our surveys provide detailed information on all client flexible hoses and relate the information to UKOOA standards, thus ensuring suitable re-inspection and preventative maintenance schedules are initiated.
